TECH™**

ONOB2511 (1½")  
ONOB2510 (1")

**Brazilian Tech™ Keratin Straightening Irons** blend liquid keratin with titanium, infusing this powerful combination into the plates of the irons to reinforce keratin's natural strengthening, smoothing, and shine-enhancing properties. Sol-Gel technology creates stronger, smoother plates. Optimum temperatures and consistent high heat up to 450°F ensure that keratin is absorbed and sealed into the hair for longer-lasting, shiny, straight results.

**The Brazilian Tech™ Blow Dryer** produces powerful, concentrated airflow for faster styling and drying. Specially designed Italian AC motor extends the life of the Brazilian Tech™ Dryer up to 3 times the typical lifespan. 2000 watts and a keratin/titanium infusion ensure long-lasting, shiny results.

ONOB125S (1¼")  
ONOB100S (1")

**Brazilian Tech™ Keratin Curl Curling Irons** feature a titanium barrel infused with keratin, a deep-penetrating protein for superior curls. This combination reinforces keratin's natural strengthening, smoothing and shine-enhancing properties. The curling irons also feature Sol-Gel technology, which creates an ultra-strong barrel surface that is 37% harder and 22% smoother than traditional curling irons. The consistent, optimum high heat, up to 400°F, ensures that the keratin is absorbed and sealed into the hair for longer-lasting styling results.

**Brazilian  
TECH™**

KERATIN

**One 'n Only® Brazilian Tech™ Keratin Kurl** This professional hair care line is designed for curly hair. Anti-frizz and anti-static properties help curls maintain texture and movement. Hair looks healthy and manageable, leaving curls bouncy with natural movement. Keratin Kurl formulas help protect curly hair against structural damage; strengthen and repair; enhance shine, smoothness and moisture; and improve texture and condition. Keratin bonds to the hair's surface. Safe for use on permed and color-treated hair.
